AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

application:

LISTING OF CLAIMS:

An acrylic film, composed of a resin composition (C) that 1. (currently amended):

comprises an acrylic graft copolymer (A) containing an acrylic ester rubber polymer and a

methacrylic polymer (B) containing 80% by weight or more of methyl methacrylate, wherein

(1) the content of the acrylic ester rubber polymer in the resin composition (C) is 5% by

weight or more and 30% by weight or less,

(2) the average particle size of the acrylic ester rubber polymer is 500 to 2000 Å,

(3) the relationship between the average particle size d (Å) of the acrylic ester rubber

polymer and the amount w (% by weight) of a cross-linking agent used in the acrylic ester rubber

polymer satisfies the following equation:

 $0.002d0.0025d \le w \le 0.005d0.0045d$,

(4) the graft ratio of the acrylic graft copolymer (A) is 30% or more and 200% or less,

and

(5) the reduced viscosity of methyl ethyl ketone soluble matter in the resin composition

(C) is 0.2 to 0.8 dl/g.

2. (canceled).

2

AMENDMENT UNDER 37 C.F.R. § 1.111

Application No. 10/531,282

Attorney Docket No. O87437

3. (currently amended): The acrylic film according to claim 1-or 2, wherein the

content of the acrylic ester rubber polymer in the resin composition (C) is 15% by weight or

more and 30% by weight or less.

4. (currently amended): The acrylic film according to claim 1-or 2, wherein the

content of the acrylic ester rubber polymer in the resin composition (C) is more than 20% by

weight and 30% by weight or less.

The acrylic film according to claim 1-or 2, wherein the 5. (currently amended):

acrylic graft copolymer (A) is prepared by: graft polymerizing a monomer mixture containing

86% by weight or more of a methacrylic ester onto the acrylic ester rubber polymer in a first

step; and graft polymerizing a monomer mixture containing 85% by weight or less of a

methacrylic ester onto the resultant graft polymer in a second step.

6. (currently amended): A laminate containing the acrylic film according to claim 1-or

2.

7. (previously presented): The laminate according to claim 6, produced by injection

molding.

3
